
01
Website Scrapping
Parse websites into structured MCQ records
02
OCR Documents
Exam past-paper PDFs via Gemini vision extraction
03
Bidirectional Text
Add RTL marks; wrap Latin/digit fragments in LRI...PDI markers
04
Quotation Normalization
Curly to straight quotes, collapse runs, repair missing openers
05
Character Normalization
NFKC plus Arabic letters remapped to Urdu (ك ,ي)
06
Punctuation Normalization
Map ASCII punctuation to Urdu equivalents (۔ ،؟ ،، ...)
07
Blank Normalization
Normalize all blank variants to exactly four underscores
08
Option Prefix Stripping
Strip redundant 'الف)' or '1.' prefixes from option text
09
Structural Cleanup
Drop malformed MCQs; normalize option lists to A–D
10
Schema Canonicalization
Unify correct_option (full text) and correct_key (A–D)
11
Subsampling
Stratified cap per subdomain × source × length tier
12
Annotation Assignment
Batches assigned to exactly two role-matched annotators
13
Annotation Consolidation
Keep dual-consensus only; prefer longer edits on conflict
14
Deduplication
Two pass: exact match, then nword-Jaccard fuzzy match
15
Consolidation
Merge scraped + annotated MCQs into one provenance-tagged set
16
Finalization
Anonymize, renumber, export slim schema to Hugging Face
